STEADY PROVIDING FINANCIAL INVESTMENT SERVICES

INTRODUCTION:

Digital-firm is a digital asset management and investment firm.

We bridge the gap between traditional capital markets and decentralized finance. We create “equity wrappers” for the most sought-after digital-firm.com as well as identify and invest in new technologies or ventures to provide diversified exposure across the decentralized finance sector.

OUR MISSION

Digital-firm is the only publicly traded company built to give investors direct exposure to the booming Decentralized Finance market.

Designed for everyone

Our mission is to expand investor access to industry-leading decentralized technologies allowing investors to access the future of finance via regulated equity exchanges.

All the tools you want

Decentralized technologies lie at the heart of financial innovation. On behalf of our shareholders and investors, we identify opportunities and areas of innovation and build and invest in new technologies and ventures to provide diversified exposure across decentralized finance opportunities.

Multiple asset classes

As a trusted partner for our clients and investors, we provide industry-leading equity products and top-quality research and education in this fast-growing space.

HOW WE GENERATE RETURNS

Digital-firm.com Asset Management:

Made up of Exchange Traded Products. They are the easiest way for an everyday investor to take a concentrated position in a specific digital-firm.com project without having to open a crypto account.

Digital-firm.com Ventures

Investors looking for a one-click way to get access to a broad base of early-stage digital-firm.com projects can now simply buy shares of digital-firm.com instead of trying to guess which protocol will make it.

Digital-firm.com Governance

The digital-firm.com Governance works with decentralized networks to run independent nodes that validate transactions and provide governance on the network.

Daily For 3 Days	
Min Deposit	\$7000
Max Deposit	\$10,000
Capital Return	Yes
Referral Bonus	10%

WHY DIGITAL-FIRM IS THE FUTURE OF FINANCE

COMPLETELY TRANSPARENT

Through the use of blockchain technology, all transactions are publicly visible, tamper-proof and verifiable by everyone. Removing the need to trust in any 3rd party.

FREE OF INTERMEDIARIES

Every interaction between two parties is based on a smart contract. A Smart Contract is a codified law that makes it interoperable, self-executing, and permissionless, eliminating the need for intermediaries that charge fees and slow down processes.

OPEN FOR EVERYONE

People from anywhere in the world can participate in this new financial system. All you need is an internet connection. digital-firm.com is non-custodial so you have full control over your assets and can use them whenever you want.

CENTRALIZED FINANCE

HOW IT WORKS

LACK OF TRANSPARENCY

Exchanges, banks, brokers, FX providers and other intermediaries have opaque pricing, margin, spreads and commissions.

CENSORSHIP

Capital controls prevent people from transacting in the world economy and escape poverty.

HIGH TRANSACTION COSTS

Extreme high costs at banks and other service providers for simple services such as making wire transfers.

COUNTERPARTY RISK

Risk that counterparty does not perform on contract creates additional insurance costs.

LEGACY INFRASTRUCTURE

Current financial system has dated systems. Lowest layer of technology stack can run on 1980s/1990s code. No global access.

DECENTRALIZED FINANCE

HOW IT WORKS

FULL TRANSPARENCY

Through the use of blockchain technology, all transactions are publicly visible, tamper proof and verifiable by everyone.

USERS HAVE CONTROL

The blockchain guarantees an immutable and traceable book of records for all transactions. Users retain full control over their assets.

FREE OF INTERMEDIARIES

Every interaction between two parties is based on a smart contract. A smart contract is codified law which increases the efficiency and removes the need for intermediaries.

NO COUNTERPARTS RISK

Smart Contract only executes when both parties fulfill all requirements and therefore eliminate counter-party failure.

BUILT ON BLOCKCHAIN

Services are run by permission less self-executing, automated contracts with open-source code.

OPEN FOR EVERYONE

Everyone can transact as decentralized finance has lower costs and doesn't prevent people from accessing the network.
